

DISCO HI-TEC EUROPE GmbH is the European subsidiary of a worldwide leading Japanese manufacturer of precision sawing, laser and grinding machines for the semiconductor and electrical industry, situated in the east of Munich.

To strengthen our team, we are looking for the following as soon as possible

Application Engineers / Application Technicians (m/f/d)

Your tasks:

As an application engineer / application technician (m/f/d), you will develop innovative applications and products together with our customers. You will be in direct contact with our customers, analyse processes and products, on our own machines, as well, and develop them further or newly. You will also assist the sales department in selling systems and, in special cases, provide support for these systems in the field.

Your profile:

- Technical studies, e.g. in the area of electrical engineering, mechanical engineering, automation engineering, physics or engineering physics, or a comparable technical education (e.g. state-certified engineer)
- Ability to document and present creative application solutions and activities in a convincing way
- Excellent understanding of various applications / uses and their effect on the products
- Experience in application engineering desirable
- Analytical, proactive approach and high degree of initiative and responsibility
- Good MS Office knowledge
- Strong communication skills and goal- and result-oriented action
- Good written and spoken English, German desirable
- Willingness to travel (within Europe and globally <20 %)
- Experience in Dicing, Grinding, Optical inspection, metal deposition are highly appreciated

Our services:

- A very interesting and long-term job, which is rich in variety, the opportunity to use and expand your know-how in challenging projects, integrated in the worldwide organization of a value-oriented and technologically leading company with about 4,500 employees
- Flat hierarchies with short decision-making paths
- Environment, that enables committed employees to put their own ideas into practice with very good development potential
- An income related to and oriented on your performance-related, including company pension scheme and other benefits
- Training and further education on the job

We look forward to receiving your complete application documents with details of your salary expectations and the earliest possible starting date.
